## Education

### Institute of Technology and Management

Bachelor of Technology in Computer Science and Engineering

2020 – 2024

Gorakhpur, Uttar Pradesh

## Experience

### Full Stack Developer Intern

June 2024 – August 2024 (2 months)

C3iHub, IIT Kanpur

Remote

- Created a backend service and user-friendly search bar for querying transaction IDs, addresses, block IDs, and exchange names for cryptocurrencies like Bitcoin, Ethereum, and Tron, with performance optimization and robust error handling.
- Enhanced the user interface by optimizing reply and chat profile components for better usability and visual appeal.
- Developed a seamless guided tour with Driver.js to improve user onboarding in a chat application.

### Full Stack Developer Intern

February 2024 – May 2024 (3-months)

BlockStash Intelligence

Remote

- Developed a comprehensive chat application with authentication, real-time notifications, one-on-one, and group chat capabilities, along with file sharing functionality using socket technology.
- Enhanced user interface and experience for company projects by focusing on frontend development, ensuring a seamless and intuitive user journey.
- Developed a core function utilizing jsPDF for generating personalized reports for individual users, facilitating seamless document production within the application.

## Projects

### Feedback App | 🎧 | 📄 | React js, Tailwind CSS, Express js, Prisma, PostgreSQL, AG Grid, JWT

November 2023

- Designed and built a web-based Feedback App using React, Node.js (Express), and Tailwind CSS.
- Implemented role-based user authentication, allowing admins to add new teachers and admin users, manage feedback, and access attendance records.
- Teachers have access to view attendance records and provide feedback for their respective students.
- Integrated data export functionality, enabling users to export feedback data as CSV files for easy analysis and reporting.

### Evolution X | 🎧 | 📄 | MERN Stack, Tailwind CSS, JWT, Recoil

August 2023

- Implemented secure user login using JWT in Evolution X, ensuring robust authentication and data protection.
- Developed an adoption center with Recoil for state management, allowing adoption of up to six base Pokémon and daily coin rewards.
- Managed real-time Pokémon health with a 10-minute meal preparation cycle and a storage limit of 5 meals, affecting health, trophies, and levels.
- Integrated a Top 10 global leaderboard and features for adopting and disowning unique Pokémon, linking trophies to evolution and gameplay.

### Onetap - Personalized landing pages | 🎧 | 📄 | MERN Stack, TailwindCSS, JWT

October 2023

- Developed Onetap app with JWT authentication for secure sign-up and login.
- Incorporated Tailwind CSS for a streamlined and visually appealing design, allowing profile customization with avatars.
- Provided users with professionally designed themes and templates for personalized landing pages.
- Enabled users to easily add and manage important links, simplifying online presence management for various professionals and content creators.

## Technical Skills

**Languages:** JavaScript, Python, Java, C, HTML, CSS, SQL

**Developer Tools:** VS Code, Github, Git, Firebase, Postman, Figma, Vercel, Netlify, Linux

**Technologies/Frameworks:** React js, Express js, Node js, TailwindCSS, Bootstrap, MongoDB, PostgreSQL, Prisma
